

CGC Water Treatment is excited to share the news that we have recently acquired DWV Plumbing. With everything that has been happening over the past year, it has become clear that we are fortunate to be able to provide an important essential service to our friends and neighbors. However, it became obvious that we could do more. We believe water treatment and plumbing go hand in hand, so we began to research the right way to bring the two together.

DWV Plumbing embraces a similar approach to customer care that we have. Our desire to provide customers with additional services coincided with Dave's desire to focus on plumbing and less on the day-to-day responsibilities of operating a business.

We are grateful to have found someone to join the CGC team and bring his expertise and services under our roof. David will continue to provide the same great care, experience and his passion for plumbing that you have come to expect but will also have a dedicated team of professionals to make doing business smooth and efficient.

We are excited for this new approach to "all things water" and our ability to be the only place that you need to go for the very best in plumbing and water treatment.
