

To my valued customers:

I wanted to let you know about some exciting changes for us at DWV Plumbing. With careful consideration we have decided to join a like-minded business that has a long-standing tradition of service and commitment to the Jacksonville area. CGC Water Treatment is the area's leading provider of Kinetico premium softeners and drinking water systems. Since much of what we do complements each other, it seemed like a natural fit as we take an "all things water" approach to our business.

By becoming a CGC team member, it will allow me to focus on the things I like to do most: plumbing and building relationships with my customers. CGC Water Treatment wants the same thing that I want and that is for you to have the absolute best experience and level of service that can be provided. I believe you will.

When you call my number, you will be connected to CGC Water Treatment. The team will happily answer any questions you may have regarding scheduling or billing. You can find out more about CGC Water Treatment at www.cgewater.com. The address is 2181 Saint Johns Bluff Rd. South, Jacksonville, FL 32246.

I look forward to continue taking take care of your plumbing needs as member of CGC Water Treatment.
